LANGUAGES

Spanish: native

English: upper-Intermediate

SKILLS

Frontend: React, React Native, Next.js, TypeScript, Astro, Tailwind CSS, Expo.

Backend: Node.js, Express, Supabase, Render.

Databases: MySQL, MongoDB (Atlas / Vector Search).

IA, Payments & DevOps: OpenAI API, WebRTC, RAG, Stripe, Mercado Pago, n8n, PostHog, Git, Resend.

PROJECTS

3Minutos - App & Pipeline de Noticias IA |
React Native, Node.js, Express, GCP, OpenAI, MongoDB

- Cross-platform mobile application integrated with a search engine, filtering, and personalized news selection for users.
- Asynchronous backend pipeline for massive article ingestion, editorial bias neutralization using LLMs, and text-to-speech (TTS) synthesis.

ERP Turismo Judaico |
Next.js, Node.js, MySQL, Stripe, n8n

- End-to-End corporate management system, featuring a custom dynamic pricing engine on the backend for complex cost calculations.
- Orchestration of 100% automated workflows using n8n: transactional webhook listening, dynamic PDF generation, and automated dispatch via Gmail API

Premier Sur Tours - E-Commerce |
Next.js, Supabase, Mercado Pago, Resend

- Commercial booking platform with a real-time admin panel, leveraging Supabase for modern database management and secure user sessions.
- Payment gateway integration ensuring transactional idempotency, paired with an automated transactional email system.

EXPERIENCE

Freelance Full-Stack Developer | 2024 - Present

- Development of management systems (ERPs) and End-to-End E-Commerce platforms for corporate clients using Next.js, Node.js, and MySQL.
- Implementation of automation workflows using n8n, integrating Gmail APIs, international payment gateways (Stripe/PayPal), and automated invoicing.
- Design of secure authentication architectures and session management using JWT and Supabase.

EDUCATION

Associate Degree in Software Programming (In Progress) | UNSAM

High School Diploma in Computer Science (2023) | ORT High School
